WE BUILD YOUR IMAGINATION

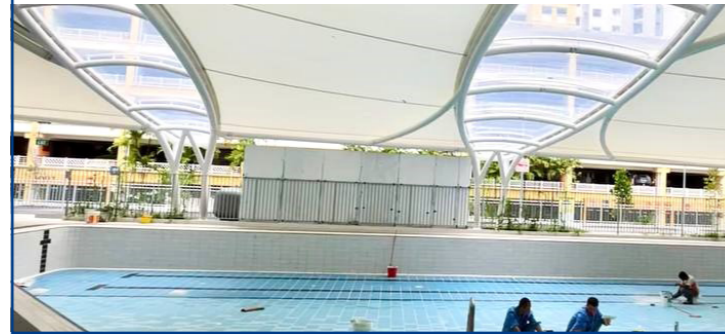

Outdoor Field
ETFE & PTFE

With ADAS® tensile membrane structures, we can establish versatile, weather-resistant areas to accommodate for various student activities, from playgrounds to grandstands, enabling all-weather engagement, ensuring continuous use regardless of outdoor conditions.

Swimming Pool
ETFE & PTFE

ADAS® solutions can promote a positive and conducive atmosphere for both structured and unstructured activities. For this hydrotherapy pool in Singapore, a unique combination of tensile fabric and transparent ETFE provide sufficient shading as well as natural daylight.

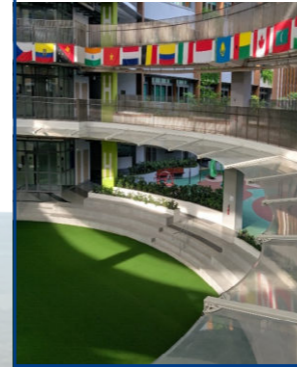

Garden
ETFE Greenhouse

Utilising ETFE structures and smart greenhouses in school gardens create a conducive environment for hands-on experiences and are an excellent avenue for environmental education.

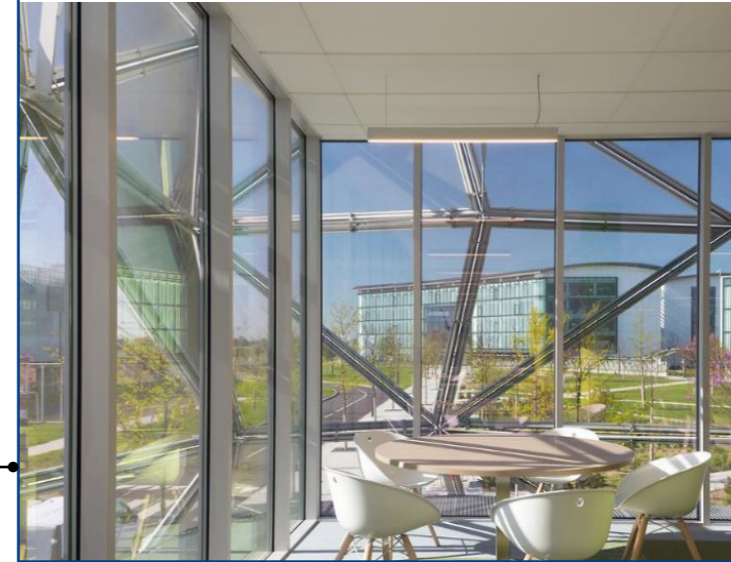

Amphitheatre

Classrooms / Offices / Libraries
Fabric Façade

Fabric façade serves as a multifunctional solution, providing effective sound barriers to reduce noise disturbances, while offering protection against sun glare and heat. It also enhances the school's personality and creates semi-porous pockets for flexible utilisation.
